

## Ecosondas Multihaz >

SeaBat 7125-SV2  
Multi-purpose multibeam echosounder system for surface vessels

SeaBat 7125-ROV2  
Multi-purpose multibeam echosounder system for ROVs

SeaBat 7125-AUV3  
Multi-purpose multibeam echosounder system for AUVs

SeaBat 7101  
Fast, accurate survey data in shallow water

SeaBat T20-P  
Portable multi-purpose multibeam echosounder system for surface vessels

MB1  
Shallow-water multibeam echosounder system

SeaBat 7111  
Mid-water portable multibeam echosounder packed with features

SeaBat 7160  
Mid- to deepwater portability and performance

SeaBat 7150  
The ultimate deepwater multibeam echosounder system

## Software >

PDS2000 Survey Suite  
Survey planning, data acquisition, processing, and chart production software

PDS2000 Dredge Guidance Suite  
Extensive software suite for dredge and construction applications

ProViewer™, ProMapper & BlueViewer  
2D imaging, Geo-Mosaicking and 3D point cloud software

## Sónar microbatimétrico vertical >

MB1350  
High-resolution side-scan gap-fill and microbathymetry sonar

MB2250  
Ultrahigh-resolution side-scan gap-fill and microbathymetry sonar

## Sónares 3D >

BV5000-1350  
High-resolution multipurpose sonar for complex structures (ROV version)

BV5000-2250  
Ultrahigh resolution for highly detailed point cloud data (ROV version)

## Sónar frontal 2D >

M900-2250-130  
Dual frequency for long-range navigation and high-resolution inspections

M900-130  
Versatile multibeam imaging sonar rated to 1000m, easy to integrate and operate

M-900-130-D  
Versatile multibeam imaging sonar rated to 4000m, easy to integrate and operate

Seabat 7128  
General-purpose, high-resolution, long-range, forward-looking sonar

## Ecosondas Monohaz >

Echotrac MKIII  
Dual-frequency echosounder

CVM  
Mobile hydrographic system

Echotrac CV200/300  
Hydrographic echosounder

Echotrac CV100  
Single- or dual-frequency echosounder

Hydrotrac II  
Single-frequency portable hydrographic echosounder

**TODOS LOS SÓNARES QUE NECESITAS, EN UN ÚNICO LUGAR**

## Perfilador de subsuelo >

Chirp III - Sub Bottom Profiler  
Portable and versatile

## Perfiladores de velocidad de sonido >

Digibar Pro  
Battery operated, stainless steel

Digibar V  
Real-time sound velocity for multibeam systems

Digibar-S  
Self-contained profiles down to 500m

SVP 70  
Real-time sound velocity probe

## Hidrófonos y Transductores >

TC2003  
Transducer for singlebeam hydrographic surveys

TC2178  
Dual-frequency hydrodynamic transducer

TC4034  
900m depth-rated hydrophone, 1Hz to 470kHz

TC4032  
600m depth-rated hydrophone, 5Hz to 120kHz

TC4014  
900m depth-rated hydrophone, 15Hz to 480kHz
