Test&Measurement

Complete measurements Complete portability

DL350 ScopeCorder

Precision Making

Bulletin DL350-01EN

A stringent measurement condition requires a high performance and flexible solution. This is the design philosophy of the DL350 ScopeCorder. With the ability to use the same 18 types of plug-in module as other ScopeCorders, the battery portable DL350 is easier to carry and easier to use in confined spaces.

Offering channel counts up to 8 analog and 16 digital, sample rates up to 100 MS/s, Isolation up to 1 KV and resolution up to 16-bit, the range of modules enables the DL350 to be configured for a multitude of long and short term measurement applications.

Rechargeable battery operation can be used for testing in remote areas or as a UPS when combined with mains power.

The DL350 delivers:

Portability – The light weight, battery operation and compact size makes the DL350 the all-round instrument-of-choice in the vehicle and in the field.

Functionality – The built-in memory provides long term recording and transient capture. An SD card provides long term storage. Advanced triggering ensures that the data is captured during the most critical of tests.

Operability – Use it like a recorder or an oscilloscope. The touch screen and choice of operating modes mean that the DL350 is as useful for simple maintenance tasks as it is for advanced measurement and analysis needs.

Maximum 8-CH high-speed isolated recording in a battery-operated compact chassis

- A4-sized compact chassis
- Simultaneous isolated inputs maximum 8-ch (1 MS/s) or 4-ch (100 MS/s) Scanning inputs maximum 32-ch (10 kS/s) or 16 channels (20 kS/s)
- AC/DC/Battery operated

Superior noise and vibration-proof Flexible recording in a single portable tool

- Choose from 18 types of input module, which are compatible other ScopeCorders.
- Vibration-resistant design
- Superior immunity
- Secure reliable data recording in harsh environment

ScopeCorder DL350

High-speed and long-term recording using large memory and direct recording onto an SD card

- Up to 100 Mpoints per module memory
- Up to 50 days continuous recording onto SD card

Ease of use in the field

- Intuitive operation using 8.4-inch touch screen
- · A choice of two operating modes provides greater flexibility
- "DL350 assistant software" helps to configure settings and to back-up data on-the-spot

YOKOGAWA ♦ DL350

More than a test tool

The DL350 ScopeCorder combines in one compact instrument all the measurement and recording capabilities you need when you are away from your office or lab. High-speed signals or long-term recording, 'quick and simple' or sophisticated operation, the DL350 provides the flexibility you need when you need it.

Complete self-contained signal conditioning

Whether it is straightforward high precision voltage measurements or a blend of signals coming from such things as current probes, temperature sensors, strain gauges, accelerometers and serial buses, the DL350 can handle them all without extra boxes or cables.

This extraordinary input capability is achieved by providing 2 slots, which can be populated with any of 18 different types of user swappable input modules. This means, for example, that user-swappable 4 isolated 16-bit voltage inputs can be measured at 1 MS/s, alongside 16 temperatures or 2 separate CAN or LIN buses each containing 30 signals. Swap a module and measure at 100 MS/s with 12-bit and 1 kV of isolation. Meanwhile there are 16 built-in logic inputs; swap in a digital input module to add even more. Make AC measurements like a DMM with an RMS module in real-time or use a math channel after the recording is finished.

Examples of complex measurements

Edd	A Ii Ai	Measurer	Measurement item		
Field	Application purpose	Slot 1	Slot 2	User advantages	
EV (electric vehicle)	Evaluation of battery voltage fluctuation while driving	Battery voltage	CAN communication data	Small size, battery drive, synchronization with GPS* position and time data	
Power tool	Evaluation of practical behavior	Battery voltage, motor rotation pulse	Tool vibration	Small size, battery drive, complex measurement of voltage and vibration	
Field device	Maintenance of ultrasonic-type vortex flow meter	Sensor receiving wave, receiving pulse	Gate signal	Small size, 2-way power source, long-term monitoring with long memory	
Factory/plant	Power quality monitoring	AC power, voltage, current	Auxiliary power source monitor	Small, portable, window trigger (instantaneous power failure, sag detection)	
Steel making Paper making	Rolling process monitoring	Thickness gauge monitor	Temperature	High noise immunity, external clock (roller) synchronization	

*Release pending in the EU and Korea. Contact your local sales office for further details.

Use it like a data acquisition system or a long memory oscilloscope

Up to 5 Gpoints of data per module can be recorded directly to an SD card. This means that the DL350 can be used for continuous recording for up to 50 days. For high speed signals, up to 100 M points per module of internal memory is available to capture fast transients. This is up to 10000 times more than other portable oscilloscopes or test tools and thus signals can be captured with higher sample rates or for much longer periods.

Accurate measurement of fast-switching waveforms

Unique amongst portable measuring instruments, there is a high-resolution high-speed sampling module available for the DL350. This provides individually isolated 12-bit, 100 MS/s inputs, which can precisely measure and record transient waveforms superimposed on slower signals. For example, transients occuring on inverter outputs, or the edges of control signals, which are beyond the reach of traditional handheld test tools.

Gate signal waveforms of inverter (20 kHz)
The picture on the left shows a waveforms measured with100 MS/s (by 720211 module) that is sufficiently high sample rate to accurately reconstruct the signal, which will result in more accurate measurements than the one on the right that measured with 1 MS/s

Comprehensive testing made easy

Full recording flexibility

For users who are more familiar with chart recorders than with long memory oscilloscopes, the DL350 offers a choice of operating modes. Recorder mode is suitable for long-term continuous recording for a specific duration and where the sampling interval is specified. A setup wizard can be used in this mode to quickly guide the operator through the entire setup process.

Scope mode enables the DL350 to be used just like an oscilloscope with all the associated benefits, like comprehensive triggering and flexible memory use. Using the history memory enables up to 1000 separate triggered acquisitions to be captured to the internal memory and viewed afterwards. Thus the causes and effects of abnormalities can be carefully analyzed as easily as paging through a photo album.

Intuitive operation

An 8.4 inch resistive touch screen has been adopted in order to deliver superior noise free performance. In environments with the highest levels of electrical noise such as motors and inverters, measurement precision is maintained whilst enabling the unit to be operated by using (gloved) fingers or stylus.

Even when the backlight is switched off and the touch screen is inactive the user still has access to the START/STOP, manual trigger and data saving keys. For users unfamiliar with state-of-the-art measuring instruments, there is also help at hand via the built-in digital manual.

A wealth of triggers for fault finding

The user has a choice of a simple level trigger or can use enhanced triggers such things as pulse width, waveform period and across multiple channels. For example, the wave window trigger is ideal for AC power line monitoring which enables voltage sags, surges, spikes, phase shifts or drop outs to be easily captured (available for 40 to 1000 Hz waveforms).

Leave a DL350 unattended and automatically save the waveform to a file, or send a notification email, if and when it triggers.

External sampling clock and triggers

The DL350 is first and foremost a field tool however it still provides the functionality you expect in a bench instrument. The sampling clock, trigger and start/stop controls are all available as external signals, thus, for example, a rotary angle encoder or degree wheel can be used as the sample clock to analyze engine rotation and performance.

Verify power line quality using harmonic, power or FFT analysis

The power in single and 3 phase systems can be evaluated. Additionally for fundamental waveforms of 50 or 60 Hz, up to 40 harmonic orders can be analyzed. Alternatively use the suite of FFT functions to perform full frequency analysis.

Harmonics analysis (bar graph)

Harmonics analysis (listed)

FFT analysis

Advanced features to support in-vehicle testing

CAN bus, LIN bus and SENT monitoring

Use the DL350 with /VE option and bus monitor module to decode CAN bus, LIN bus or SENT signals and display information such as engine temperature, vehicle speed and brake pedal position as trend waveforms and compare this with the analog data coming from the actual sensors. This enables automotive engineers to gain an insight into the dynamic behavior of the complete electromechanical system.

The symbol editor is a software tool that makes it possible to define which physical values from the CAN or LIN bus data frame will be trended as waveform data on the display of the DL350. The Symbol Editor can accept vehicle installed definition files (CAN DBC, LIN LDF)

Position and global timing using GPS

An optional GPS unit* enables latitude, longitude, altitude, speed and motion direction data to be synchronized with the waveform data, perfect for drive testing, mobile testing, or distributed field recordings.

*Release pending in the EU and Korea. Contact your local sales office for further details.

Mains, DC or rechargeable battery power

The built-in rechargeable battery provides 3 hours of continuous operation for mobile measurements or can serve as a backup power supply if the main DC power is disconnected. This makes the DL350 a highly reliable ScopeCorder for tests which are difficult or expensive to repeat.

Operates in freezing temperatures

Even when used with the rechargeable battery, the DL350 will operate in temperatures from 0 to 45 degrees. The DL350 brings high-quality laboratory measurements into the harsh environments of the field.

Vibration resistant

Instruments used for in-vehicle driving tests or field maintenance must be able to make reliable measurements. The DL350 has an aluminum inner frame and an external rubber bumper and conforms to the Japanese JIS D1601 standard for resisting in-vehicle shock and vibration.

Technology Story

Input modules used in the DL350 ScopeCorder are compatible with the DL850E and DL850EV ScopeCorders, and the SL1000. The DL350 inherits the technological developments of more than 30 years of commitment to the measurement needs of electromechanical systems.

isoPRO™ – pioneering measurement technology

Input modules are powered by YOKOGAWA's isoPROTM technology, which offers industry-leading isolation performance at the highest speeds. isoPROTM core technology, designed with energy-saving applications in mind, delivers the performance needed to develop high-efficiency inverters that operate at high voltages, large currents and high frequency.

The use of optical fibers enables the achievement of high speed data transmission and high voltage isolation.

Higher voltage registration and better CMRR

720268 High Voltage Input Module

The new high-Voltage, high-resolution, 1 MS/s 16 bit Isolation Module (model 720268), which is also capable of direct RMS measurements, has an improved sample rate (1 MS/s) and an improved maximum input voltage (1000 Vrms).

Normally, to realize high insulation performance in a small package, it is necessary to raise the input impedance and lower the voltage of the internal circuit. However the increase in input impedance causes a reduction in the common-mode rejection ratio (CMRR) and measurement accuracy.

Thanks to the new digital isolator in this module, high voltage input signals can be acquired without an increase in size. High insulation performance is maintained without compromising the CMRR.

Flexible operation

- 1 START/STOP key
 - LED indicates the DL350 measuring status.
- 2 TRIGGER key

Used for triggering the DL350 manually

3 SAVE key

A pre-programmable button that saves data to SD card or network storage

- 4 Power switch
- 5 8.4-inch touch screen
- 6 Input module slots (2 slots)
- 7 Logic input terminals

- 8 GPS* input terminal
- 9 EXT I/0

Multifunctional port used for external start/stop input, trigger I/O, external clock input and other functions

- 10 SD memory card slot
- 11 USB ports for peripherals and storage devices
- 12 Ethernet (100BASE-TX/10BASE-T)
- 13 USB port (PC)
- 14 Battery pack (/EB option)

^{*}Release pending in the EU and Korea. Contact your local sales office for further details.

The application solver

Using different modules and accessories, the DL350 ScopeCorder addresses the complex measurement and analysis needs of widely diverse applications in the field.

Electric vehicle inverter voltage evaluation

The voltage fluctuations of the input and output of the inverter can be measured alongside the trends of speed, acceleration and braking from the data on the CAN bus.

Up to 2.5-hours of continuous data can be directly recorded to the SD card with sample rates up to 200 kS/s.

The optional rechargeable battery pack enables the DL350 to be continuously operated without burdening the in-vehicle power supply.

The optional GPS unit* adds coordinate information to the recording data to enable the measurements to be correlated with the location of the vehicle in a drive test.

	Recommended accessory

*Release pending in the EU and Korea. Contact your local sales office for further details.

Power line monitoring in plants and factories

By using a wave-window trigger, voltage sags, surges, spikes and dropouts can be detected and captured.

Multi-phase voltages up to 1 kVrms and 1.4 kV peak can be recorded using 720268 high-voltage isolation modules.

In the case of unattended operation, waveforms can be saved, or an e-mail sent, when the DL350 is triggered.

Recommended modules High-voltage isolated module (1 kVrms) Recommended functions Wave-window trigger, Action-on-trigger

Industrial robot maintenance

It is possible to monitor and record the control signals to the servomotors and their speed and torque at the same time.

For condition monitoring, FFT analysis can be used on the vibration signals from accelerometers to help identify potential failures in machines or components.

Remote operation is available using the 'assistant software' or the input/output terminals making it potentially safer to use.

Re	commended modules	Recommended functions

Consistent measurement results in R&D and maintenance

Traditionally different measuring instruments of various sizes and capabilities are used in the R&D lab and in the field. Since the accuracy, noise immunity and other characteristics are not the same, engineers struggle to correlate measurements.

The plug-in modules of the DL350 are common* to those of the DL850E and DL850EV, the higher-end ScopeCorder models. By using common* modules for product design, validation and on-site maintenance, the high quality of the measurements is consistent.

Accessories and software

PC data and setup file management

DL350 Assistant software — Free Software —

Data files or setup configuration files stored in the DL350 SD card can be backed up with the press of a button.

Remote setting, start-stop control and setup file editing can also be easily done on the connected PC.

Remote waveform monitoring and instrument control

Xwirepuller -Free Software

Remote control and waveform display monitoring of a DL350 via USB or Ethernet.

Display and analysis of recorded waveforms

Xviewer LITE -Free Software -

Load waveforms captured by the DL350 and display, zoom, and export the data to the popular CSV format.

Xviewer

-Advanced Software-

In addition to the features of Xviewer LITE, parameter measurement, statistical analysis, FFT and filtering on downloaded DL350 Data can be performed.

Free Xviewer trial

Get the free 30 day trial version of Xviewer at tmi.yokogawa. com.

^{*1:} A separate driver is required.

General Specifications Standard operating condition	ns Ambient Temperature: 23 ±5°C
Staridard Operating Condition	Ambient hamidity: 20 to 80% RH After the DL350 has been warmed up for 30 minutes and
	then calibration has been performed
Recommended calibration p	period 1 year
Warm-up time	At least 30 minutes
Operating environment	Temperature: 0 to 45°C
	(While an AC adapter is working: 0 to 40°C, while a battery is being charged: 0 to 35°C) Humidity: 20 to 85% RH (no condensation)
0	Altitude: 2000 m or less
Storage environment	Temperature: -20 to 60°C Humidity: 20 to 85% RH (no condensation)
Power supply	The DL350 operates on the AC adapter (720921), DC powinput (720922) or the battery pack (739883).1122
AC adapter (720921)	
Rated supply voltage	100 to 240 VAC
Permitted supply voltage	
Rated supply frequency	50 or 60 Hz
Permitted supply voltage	47 to 63 Hz
Maximum power consur	nption 120 VA
Withstand voltage	3 kV (between the main unit and AC adapter power line)
Insulation resistance	10 MΩ (between the main unit and AC adapter power line)
DC power input (720922) Rated supply voltage	10 to 30 VDC (at the DL350 connector end)
Maximum power consur	nption 45 W
Withstand voltage (when	the power is turned off or charging is stopped) 0.6 Wtyp
DC power cable	Cigarette lighter plug Type, length: 2.5 m
Battery pack (739883) Type	Lithium-ion
Operation time	Approx. 3 hours
Charge time	Approx. 6 hours (When the DL350 is turned off.)
Installation position	Vertical orientation installation, horizontal orientation installation or inclined installation
External dimensions	Approx. 305 mm (W) \times 217 mm (H) \times 92 mm (D) (not including the protrusions)
Weight	Approx. 3.9 kg (when the DL350 equipped with the battery and 2 pieces of 720254.)
Instrument cooling method	Forced air cooling (exhaust)
Battery backup	The settings and clock are backed up with an internal lithium battery Life: Approx. 5 years (at an ambient temperature of 23°C)
Safety standard	Compilant standards EN61010-1, EN61010-2-030, EN61010-031, EN60825-1 Pollution degree 2
	Measurement Category: See the specifications of each module.
Emissions	Compliant standards EN61326-1 Class A, EN61326-2-1, EN55011: Class A, Group 1 EMC Regulatory Arrangement in Australia and New Zealand EN55011 Class A, Group 1 Korea Electromagnetic Conformity Standard
Immunity	Compliant standards EN61326-1 Table 2 (for use in industrial locations), EN61326-2-1
Environmental standard	Compliant standards EN50581 Monitoring and control instruments including industrial monitoring and control instruments.
Standard of resistance again	nst vibration JIS D 1601:1995 5.2 5.3 (1) Type 1: Type A compliant

JIS D 1601:1995 5.2 5.3 (1) Type 1: Type A compliant

*1: Operation of the battery pack requires the battery pack cover (720923).

*2: AC adapter or DC input has priority if those input and battery are available

GPS unit (B8093YA) Specifications		
Receiver type	GPS/GLONASS/QZSS/SBAS (MSAS/WAAS/EGNOS/GAGAN)	
Function	GPS data acquisition (latitude, longitude, altitude, speed, moving direction and GPS information), DL350 time synchronization	
Measurement accuracy *1	Horizontal position: 15 m or less (GPS information/SA=OFF/PDOP≤3) Speed: 1 m/s (GPS information/SA=OFF/PDOP≤3)	
Following performance	Altitude: -500 to +18000 m Speed: 1800 km/h or less Acceleration: 2 G or less	
Measurement resolution	Latitude and longitude: 1 µ° Altitude: 0.1 m, 1 m Speed: 0.01 km/h, 0.1 km/h Direction: 0.01°	

^{*1:} The specification values may not be attained depending on the measurement location, environment and measurement time.

B9852MN	Safety mini-clip (Hook type)	1000 Vrms-CAT III red
701954	Large alligator-clip (Dolphin type)	1000 Vrms-CAT II, 1 set each of red and black
758929	Alligator clip adaptor set (Rated voltage 1000 V)	1000 Vrms-CAT II, 1 set each of red and black
758922	Alligator clip adaptor set (Rated voltage 300 V)	300 Vrms-CAT II, 1 set each of red and black
758921	Fork terminal adapter set	1000 Vrms-CAT II, 1 set each of red and black
701940	Passive probe ^{*2}	Non-isolated 600 Vpk (10:1)
366926	1:1 BNC-alligator cable	Non-isolated 42 V or less, 1 m
366961	1:1 Banana-alligator cable	Non-isolated 42 V or less, 1.2 m
720930	Clamp-on probe	AC 50 A
720931	Clamp-on probe	AC 200 A
701955	Bridge head (NDIS, 120 Ω)	With 5 m cable
701956	Bridge head (NDIS, 350 Ω)	With 5 m cable
701957	Bridge head (DSUB, 120 Ω)	Shunt-CAL with 5 m cable
701958	Bridge head (DSUB, 350 Ω)	Shunt-CAL with 5 m cable
758924	Safety BNC-banana adapter	500 Vrms-CAT II
702911	Logic probe ³	8-Bit, 1 m, non-Isolated, TTL level/Contact Inpu
702912	Logic probe ^{*3}	8-Bit, 3 m, non-Isolated, TTL level/Contact Inpu
700986	High-speed logic probe ³	8-Bit, non-Isolated, response speed: 1 µs (typ.
700987	Isolated logic probe'4	8-Bit, each channel isolated
758917	Measurement lead set	Measurement leads (2 per set) Alligator-Clip is required separately.
758933	Measurement lead set	1000 V/19 A/1 m length Alligator-Clip is required separately.
701902	Safety BNC-BNC cable (1 m)	1000 Vrms-CAT II (BNC-BNC)
701903	Safety BNC-BNC cable (2 m)	1000 Vrms-CAT II (BNC-BNC)
B8093YA	GPS unit'5	For DL350
701948	Plug-on clip	For 702902, 700929 and 701947
701906	Long test clip	For 701901 and 701904
A1800JD	Terminal	For 720220 input terminal, one (1) piece
705926	Connecting cables	Connecting cable for 701953 (1 m)
705927	Connecting cables	Connecting cable for 701953 (3 m)
93050	Carrying Case	

^{*1:} Actual allowable voltage is the lower of the voltages specified for the main unit and cable.

This is a Class A instrument based on Emission standards EN61326-1 and EN55011, and is designed for an industrial environment. Operation of this equipment in a residential area may cause radio interference, in which case Ye'ar Warranty users will be responsible for any interference which they cause.

 Before operating the product, read the user's manual thoroughly for proper and safe operation.

ScopeCorder, GIGAZOOM are registered trademarks of Yokogawa Electric Corporation. 'Any company's names and product names mentioned in this document are trade names, trademarks or registered trademarks of their respective companies. The User's Manuals of this product are provided by CD-ROM.

Yokogawa's approach to preserving the global environment

- Yokogawa's electrical products are developed and produced in facilities that have received ISO14001 approval.
- In order to protect the global environment, Yokogawa's electrical products are designed in accordance with Yokogawa's Environmentally Friendly Product Design Guidelines and Product Design Assessment Criteria.

^{*1:} The main unit requires plug-in module (s).
*2: AC adapter(720921) is not included in DL350. It is required for charging battery. Standard accessories: Hand strap, Slot cover panel (2), User's manual

^{*2:} Operation of the battery pack (739883) requires the battery pack cover (720923)

^{*3:} Included in the /EB option.

^{*}The /VE option is required when using the 720240, 720241 or 720243 module.

^{*}The use of a 720221 module always requires the External Scanner Box (model 701953).

^{*2: 30} Vrms is safe when using the 701940 with an isolated type BNC input.
*3: Includes one each of the B9879PX and B9879KX connection leads.

^{*4:} Additionally, 758917 and either the 758922 or 758929 are required for measurement.

^{*5:} Release pending in the EU and Korea. Contact your local sales office for further details.
